

# Noora Fathima EK

WEB DEVELOPER

CALICUT, KERALA | 8089481185 | noorafathimaek@gmail.com

## PROFILE

During my ME(A)RN Stack internship, I focused on frontend development, creating web applications with MongoDB, Express.js, Angular, React, and Node.js. I worked closely with my team to bring user-focused features to life.

## EXPERIENCE

Six month internship in MEARN Stack.

## EDUCATION

### Masters of Computer Applications

KTU University, 2022-24

### Bachelor of Computer Applications

Calicut University, 2018-21

## EXTRA ACTIVITY

MERN stack Development - ICT Academy

DataBase Management System - NPTEL

Cloud Computing - NPTEL

## SKILLS

- HTML
- CSS
- TAILWIND CSS
- BOOTSTRAP
- JAVASCRIPT
- REACT
- ANGULAR
- FIGMA

## PROJECTS

### LIBRARY MANAGEMENT SYSTEM - MERN

Created a web application for managing library functions, such as user registration, book catalog management, and handling book requests. Integrated role-based access for admins and users, tracked issued books, and ensured data consistency. Utilized MongoDB, Express.js, React.js, and Node.js to deliver a full-stack solution.

## **EMPLOYEE PORTAL - MEAN**

Employee Portal is an Angular-based web application for efficient employee record management. It supports logging in, viewing, searching, sorting, editing, and deleting employee information. Users can also export data to PDF. The app features a modern UI with Angular Material and integrates SweetAlert2 for alerts and jsPDF for report generation. It's designed to be responsive and user-friendly.

## **MEDIA PLAYER - MERN**

The Media Player is built using React for the user interface and state management, ensuring a dynamic and responsive design. JSON Server is used to simulate a backend, managing data for videos, categories, and watch history. React Router facilitates navigation between different pages, while Font Awesome is used to incorporate icons, enhancing the visual appeal and functionality of the application.
